

Sprint 4 Report

Product: First Ascent

Team Name : FirstAscent

Date : 12/02/2018

Actions To Stop Doing

- Stop having group meet ups after class, since quarter is coming to an end.

Actions to Start Doing

- Start talking to each other about any problems we are having to get help.

Actions To Continue Doing

- Continue looking over each others' code to stay up to date with changes in project.
- Continue communicating through discord voice chat when unable to meet up in person.

Completed

As a group, we decided to use our time during the last sprint to implement the backlogged tasks that were thought were more important to the functionality described by the product owner. While we did not complete any tasks from this sprint, we managed to finish all other tasks from previous sprints:

Task 5. (Sprint 3) [2] Create a comment section for other user's to leave feedback

Task 4. (Sprint 2) [1] Include the Google Maps API into the post page.

Task 6. (Sprint 2) [1] Use GPS coords provided by the user to display a boulder's location with Google Maps.

In Progress

Task 1. [3] Find a way to sort posts in database via difficulty (or some other metric). We were unable to finish this task because it was more difficult than anticipated, which seems to be a trend in our sprint plans. Although we found a way to filter posts in the database, we had difficulty showing search results.

Not-Completed

Task 2. [3] Show pins of search results on map

Task 3. [3] Implement a user class that contains a vector of posts

Task 4. [2] Show pins of user posts on map

Task 5. [2] Create a module in user class with a vector of favorited posts
