

### FirstAscent Developer Installation Guide

- 1) Install latest versions of node.js and react
- 2) Pull all of the code from the repository  
`https://github.com/ewarkent/FirstAscent`
- 3) Create a react environment with the following command in your own project directory:  
`$ npm install -g first-ascent`
- 4) Install the various libraries  
`$ npm install react-router-dom`  
`$ npm install firebase`  
`$ npm install react-firebase-file-uploader`  
`$ npm install validator`  
`$ npm install --save google-maps-react`
- 5) Launch the project on your local device with the following command  
`$ npm start`

The Firebase and Google Maps API keys used by the First Ascent developing team have been omitted for security reasons. Please contact First Ascent Team for access, or use your own.
