

FirstAscent Style Guide

- Create external CSS files for each JS file
- Give descriptive classnames to each div/span/function/class/etc
- Use comments to show where each block of CSS relates to
- Use comments above blocks of code aren't obvious to show what they do
- Keep simple html divs/spans in a single line
- Nested blocks of code should be indented when added with a tab
- Place import statements at the top of the pages
